If you are looking for proven depth of pedigree with carcass results then this is the sire. GRSFN0895 is a son of GRSFK0483, whose total of 45 carcass progeny have seen 10*MS10, 13*MS9 and 10*MS8 results. N895 is a large sire himself and his dam PMGFC0133 has 2*MS9 carcasses and a MS7. We anticipate GRSFN0895 to sire good frame progeny that have excellent marbling given his proven pedigree for results. His oldest steer progeny are now on feed.

Free of all recessive genes.
