DAM: GRSFC0021 Goorambat F C0021 (AI) (ET)

GRSFY0101 Goorambat F Y101

F146 is one of the first 40/1 sons to have semen available in Australia. His sire, Terutani 40/1 is the bull everyone has wanted to use in a full-blood breeding program due to the progeny results under feedlot conditions and also because of the milk and size he is leaving in his daughters. By combining the all round ability of Terutani 40/1 from the Tajima line with the maternal grandsire Itoshigenami TF148 from the Shige Kanenami line, we are bringing into the pedigree the famous cow families of Okutani, Suzutani and Rikitani. The extra marbling ability added by having TF 148 should make this young sire a favourite of breeders of both full blood and commercial crossbred Wagyu. Tested FREE of all 5 recessive genes.

* **Export qualified semen available @ \$25 + GST**
